Comments:

The findings of this Triennial Assessment were presented and reviewed by every member of the Wellness Committee. As a committee, there is a goal to provide support around more consistent nutrition messaging throughout the schools and work to provide healthier classroom celebrations. We would also like to provide more support on not using food as rewards. As a committee we'd also like to do more to promote staff and employee wellness.

Overall, we feel that the district does a lot to promote wellness and we want to help continue to support that.
